**>>> Caring & Effective Service**

- Provide customized services.
- Offer full - store output services.
- Invent the "Everything Can Be Grabbed" machine, breaking the tradition that claw machines can only grab plush dolls. This expands the range of prize options, thereby increasing the player base and the revenue of the venue.

# Features of the independently developed 4.0 claw machine program system

There are five settable ways for gifts to drop, which increases the playability and interestingness of the machine. In particular, setting the fixed dropping position near and on the baffle of the prize outlet increases the sense of experience and stimulates players to continue inserting coins, thus increasing revenue.

In the newly upgraded system, a cost mode is added. According to the product value, coin value, and desired profit, it will automatically show how many rounds a player needs to win a prize. Merchants can have a more intuitive understanding of the machine's profit situation. It can also save setting time and labor costs.

The interconnected machines support sharing of winning probabilities and flashing lights simultaneously when winning a prize. This function can enhance the atmosphere of the entire store, increase the playability of the machines and the gaming experience of players. As a result, it can increase the coin insertion rate and reputa-

# Product Introduction

- Stylish and cool design, allowing 4 players to play simultaneously.
- Vivid and fun way of simulating excavator to grab prizes, highly attractive.
- Incorporates the element of the push - plate game, with high playability.
- Extra - large prize space, reducing the frequency of refilling prizes.
